stationary use**

**Many years of  
experience**

**Technical consulting  
& support**

## Our products

Our primary business is the marketing of modular battery rack systems for use in standard and earthquake applications.

Our range is complemented by the production and global distribution of plastic-coated steel trays and plastic trays for traction batteries.

## We convince with

- technically proven solutions for
  - standard and special applications
  - earthquake and shock proof
- high-quality products
- comprehensive technical advice
- project engineering in the nuclear power and offshore sector
- long-term experience in the field of coating methods for perfect insulation

## Excellent quality and service for your needs

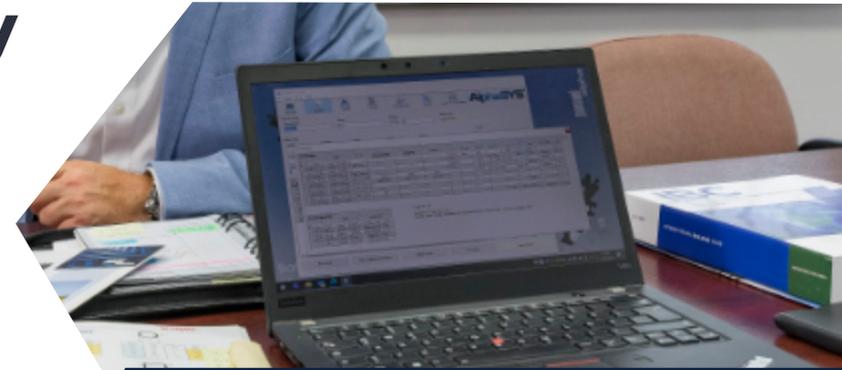

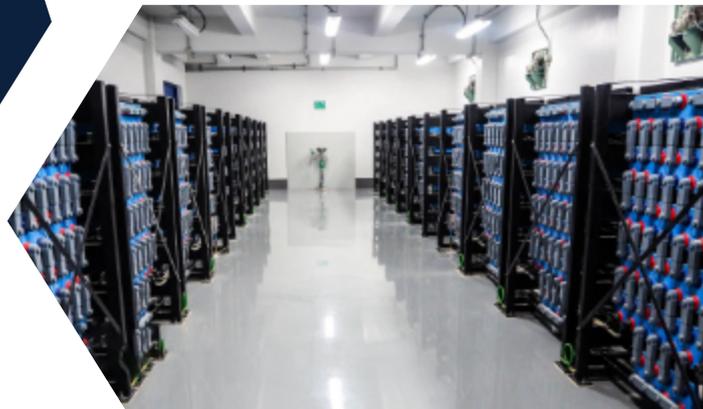

### Worldwide delivery

We offer you reliable and efficient worldwide delivery of your products.

### Consulting and technical support

Our team is at your disposal to support you with all your questions and concerns.

**Configure standard racking systems according to your requirements independently and easily.**

## AlphaSYS®

The software AlphaSYS® was developed especially for our customers. AlphaSYS® Web is available online including a demo version.
